

PROGRAM & VENUES REGIONAL BETTER BUILDING SHOWS FEBRUARY TO APRIL 2012

Gayndah, Clermont & Airlie Beach

- 2.00pm - 2.30pm **Registration** – Tea and coffee on arrival
- 2.30pm – 3.00pm **WPHS - Asbestos Removal** - Identifying, safely removing and working with asbestos containing materials.
- 3.00pm – 3.45pm **New Timber Framing Code** – A DVD hosted by Colin MacKenzie of Timber Queensland, this presentation provides a brief but practical overview of the main changes to the new Timber Framing Code (AS1684 2010) that will be released in the 2011 edition of the Building Code.
- 3.45pm – 4.15pm **Afternoon Tea**
- 4.15pm to 4.40pm **Engineered Timber Products** – Colin MacKenzie explains provisions in the new Code that relate to Engineered Wood Products. In conjunction with BSA and product manufacturers, he will then elaborate on some of the common issues of defective work associated with the use of Engineered Wood Products.
- 4.40pm – 5.40pm **Common Defects in Passive Fire Protection Systems** - Defective fire separation can have tragic consequences and continues to be one of the most concerning items of defective work reported to BSA. As a result, responsible builders, contractors, designers and certifiers can face expensive repair costs, potential legal action and loss of licence. In this presentation, industry experts look at some examples of common defects and the extensive repair methods required for rectification. You'll also learn how to prevent the most common defects.

Ingham

- 1.15pm – 1.45pm **Registration** – Light Lunch
- 1.45pm to 2.45pm **Building to Resist Natural Disasters** - Practical tips to improve the wind resilience of homes – lessons from Cyclone Yasi and other high wind events. Presented by representatives from the cyclone testing Station at James Cook University, this session identifies poor construction practices found to lead to building failure in high wind events. It provides practical tips for builders and contractors on correct construction practices throughout Queensland to assist in avoiding premature building failure in storms. The importance of durability and maintenance of building materials will also be discussed.
- 2.45pm – 3.15pm **WPHS - Asbestos Removal** - Identifying, safely removing and working with asbestos containing materials.
- 3.15pm – 3.40pm **Afternoon Tea**

- 3.40pm – 4.25pm **New Timber Framing Code** – A DVD hosted by Colin MacKenzie of Timber Queensland, this presentation provides a brief but practical overview of the main changes to the new Timber Framing Code (AS1684 2010) that will be released in the 2011 edition of the Building Code.
- 4.25pm to 4.50pm **Engineered Timber Products** - Colin MacKenzie explains provisions in the new Code that relate to Engineered Wood Products. In conjunction with BSA and product manufacturers, he will then elaborate on some of the common issues of defective work associated with the use of Engineered Wood Products.
- 4.50pm – 5.50pm **Common Defects in Passive Fire Protection Systems** - Defective fire separation can have tragic consequences and continues to be one of the most concerning items of defective work reported to BSA. As a result, responsible builders, contractors, designers and certifiers can face expensive repair costs, potential legal action and loss of licence. In this presentation, industry experts look at some examples of common defects and the extensive repair methods required for rectification. You'll also learn how to prevent the most common defects.

Date	Region	Venue
9 February	Gayndah	Supper Room, Shire Council, 34 – 36 Capper Street, Gayndah
21 February	Clermont	The Clermont Club, 48 Sirius Street, Clermont
28 March	Airlie Beach	Cannonvale Reef Gateway Hotel, 38 Shute Harbour Road, Airlie Beach
18 April	Ingham	Herbert River RSL, 4 Hawkins Street, Ingham
